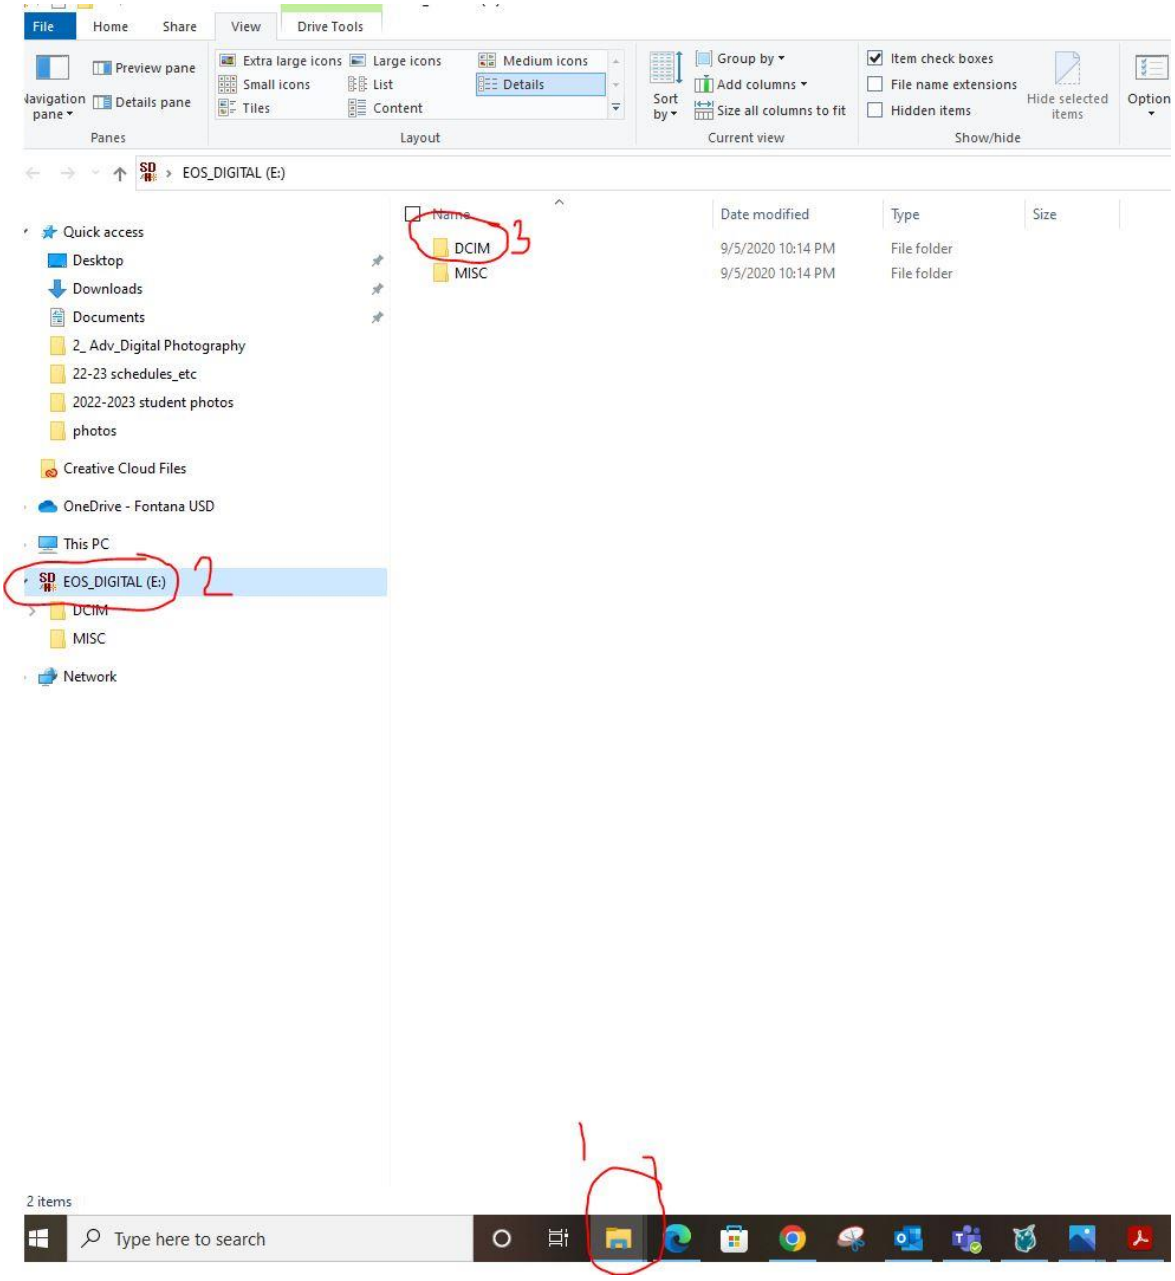
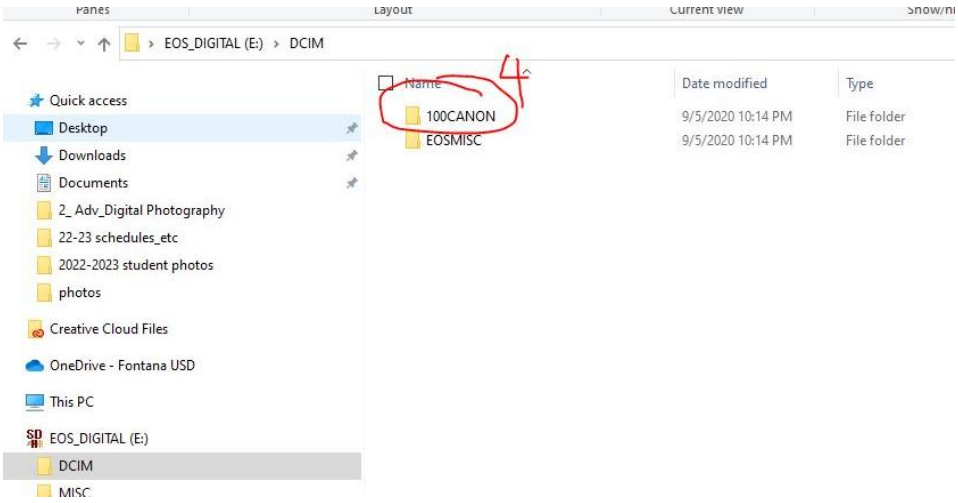
Saving Photos from SD Card to One Drive:

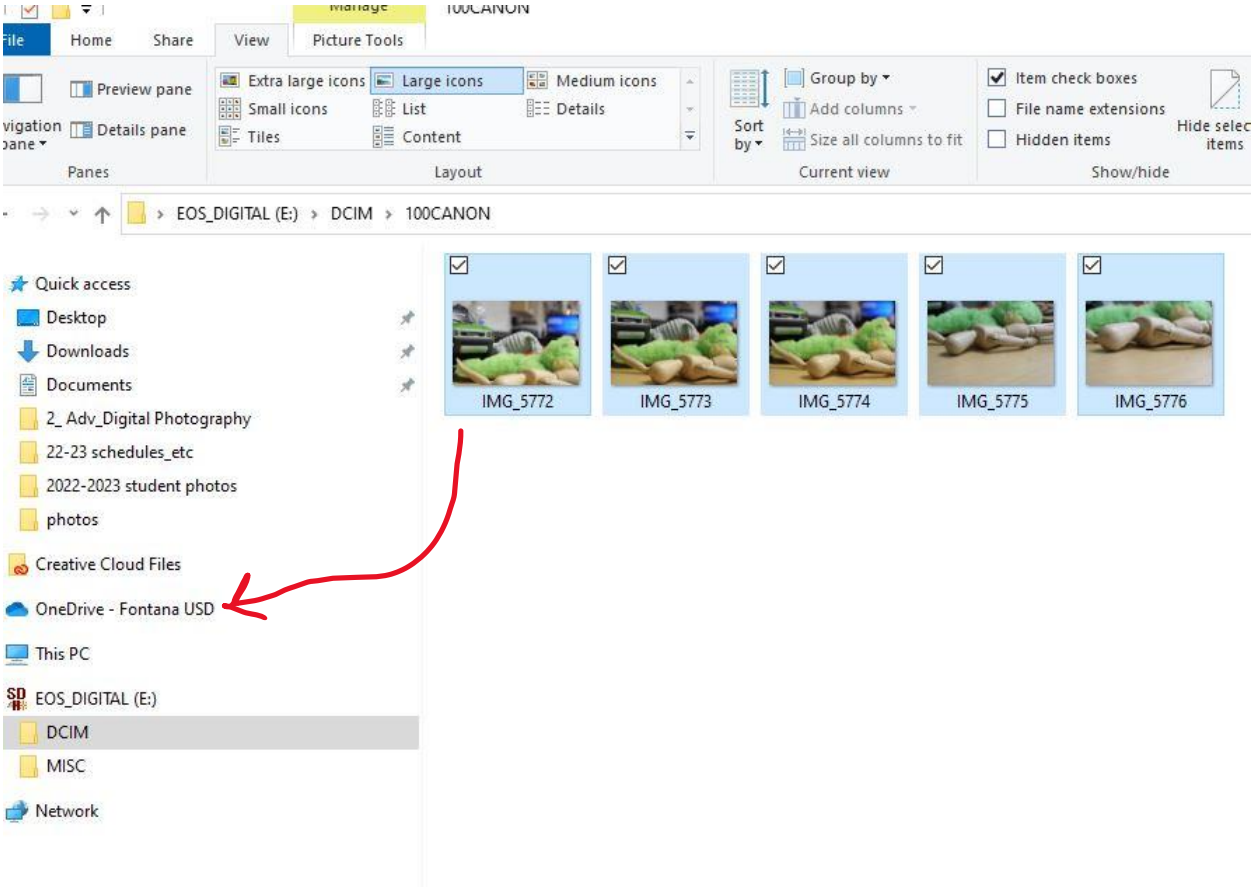
Remove the SD card from your camera. It is located either in the bottom of camera with the battery, or on the right side SD card compartment. Push down the SD card and it will pop up.

Insert SD card to the SD card slot on your computer.

Locate the File Explorer icon (1) and double click to open. You will see the EOS Digital Sd Card listed on the left (2), open the SD card folder. You will click on two more folders: DCIM (3) and then 100Canon (4).







Select all your photos by clicking and dragging your mouse,

OR hold down CTRL while clicking on the photos you want,

OR click the first photo and hold down SHIFT to select the last photo (this will select the sequence)

Then right click on any of those selected photos and select COPY.

Go to your One Drive, right click and PASTE. Done!

Put SD Card back in camera (insert correctly!), click the Menu button to Format Card:
